1. Time on snow will vary depending on the age, ability level and stamina of the group. For some children, they will break only at the scheduled lunch break and ski for the rest of the day.
2. For some groups and particularly those that are young (3-4 years old) or new to the sport, they may break more regularly during the day. **Our main aim is to teach your kids to love the snow and have fun.** Our instructors will spend the day with your group sliding, exploring, laughing, learning and playing. However, younger groups may progress quite slowly. If the group only wants to play in the snow, that is what our instructor will do.
3. Our instructors will always have a specific skill or goal that they will be working on to keep your child progressing and improving.
4. Please keep in mind we are not able to offer a baby-sitting service; this means if your child does not want to ski, is too tired or unwell we will need to call you to collect them.
